

**Letter of Intent
Distribution
Tropical Systems Resource Call-Out / Assignment
Boundaries**

This is a minimum guideline when an acute shortage of Bargaining Unit personnel exists confronting a named Tropical Weather System and does not preclude the calling of employees from additional service center locations as necessary before the utilization of other qualified extendo stick operators. Every effort will be made to communicate with the Business Manager's office and / or his appointee when the intention to implement is being considered.

The following Tropical Systems Resource Call-Out / Assignment Boundaries Matrices are to be used by the Power Systems, Distribution Business Unit. The intent of these documents is to provide each local Service Center, Distribution Control Center (DCC), Power Delivery Diagnostic Center (PDDC) and the FPL Command Center (FPLCC) with the agreed upon methodology for the use of Bargaining Unit personnel prior to the utilization of other qualified extendo stick operators in the following situations:

- After Landfall of a Named Tropical Weather System

This is an additional methodology to be utilized after the Bargaining Unit and Contractor resources have been exhausted and is not intended to replace or be used prior to the guidelines established using the Power Systems Overtime Call-Out Boundaries Matrix dated 6-14-2022, prior to calling qualified extendo stick operators to work as a resource to supplement the acute shortage of Bargaining Unit personnel as a result of a Named Tropical Weather System in a Service Center boundary, the eligible Bargaining Unit employees from the corresponding Service Centers on the matrix must be offered. This will require an "All Hands-on Deck" call-out prior to implementation.

Jack Wilson
