

System Council U-4 Negotiation News

September 11, 2009

Volume #2 Number # 4

The System Committee and the Company met throughout this week and focused on proposed wages for the negotiated term of the contract. It is our belief that we have made considerable advances toward the middle ground in an effort to close the gap between the Company's and the Union's proposed wage rates.

We still have a few open issues in the Power Generation and Nuclear Division that will be addressed in the coming weeks.

The System Committee has called for a Special called System Council U4 Delegates Meeting to be held on Thursday, September 24, 2009. The scheduled time required should not take longer than a half day to complete the required business agenda.
