

# *System Council U-4 Special Bulletin*

*April 30, 2008*

The Business Manager and System Committee met with Keith Hardy, Vice President, Power Generation Business Unit, along with the Director and Manager of Labor Relations to discuss the Company's modernization plans for the Cape Canaveral and Riviera Beach Power Plants.

The Company requested the Unions consideration for temporary re-assignment of the current employees to other locations upon shut down of the Cape Canaveral and Riviera plants while the demolition of the old units and construction of new units takes place.

Your Committee responded to the Company in writing that the System Committee is prepared to meet, discuss and bargain in detail, all the avenues within and outside the current terms of the Collective Bargaining Agreement in an effort to mitigate the impact to all the Bargaining Unit employees that may be affected.

We would like to remind all Bargaining Unit employees to stay focused on the task at hand and continue to work safe.

As information becomes available we will continue to communicate to the Membership.
